

# WHAT YOU TOLD US

## Consultation update

For the past month, the team has been collecting feedback from local residents, businesses and community organisations, as well as maintaining regular contact with the London Borough of Newham, the GLA, London City Airport and others in progressing the proposed design and uses for Phase 3.

We have spoken to over 80 people living and working in the local area. The general principle for expansion and improving the landscape around the site has been well-received by the majority of our neighbours. We have received some very useful feedback on the concepts and designs for the site, which we have summarised in the three core themes below.

The design team has taken on board the comments received and the updated plans demonstrate how we have reflected your feedback in our revised proposals.

Thank you for providing us with your comments and please continue to keep giving us your feedback.

### Dock-edge landscape

“More comfortable benches to sit and look at the water.”

“I’m very much in favour of your proposals - please take this opportunity to provide local residents with lovely places to go to and “be” in.”

“There is no greenery at all along your water’s edge - this really needs to change. There also needs to be more protection from the weather.”

### Further activation and uses

“I feel the general area around ExCel and Royal Docks is lacking entertainment and leisure for the local community.”

“More needs to be done to offer local amenities that face the water and create activity. The water edge is a dead zone along the ExCeL which is underutilized.”

### Security and transport

“Separate lanes for walking / running / cycling.”

“To install CCTV, improved lighting and patrols to prevent crime and illegal fishing, frequently seen.”

“The open space and the parking space will vanish.”

“I support the idea as long as access to dock-edge is free to public.”
