

IMPROVING THE LOCAL ENVIRONMENT AND PUBLIC REALM

As we highlighted in our first stage consultation, to accommodate the new event space, part of the existing pedestrian walkway running from Prince Regent DLR to the dock will be moved.

The existing pedestrian routes towards the east of ExCeL lack any animation, fail to provide residents with a sense of place and are unwelcoming and unsecure.

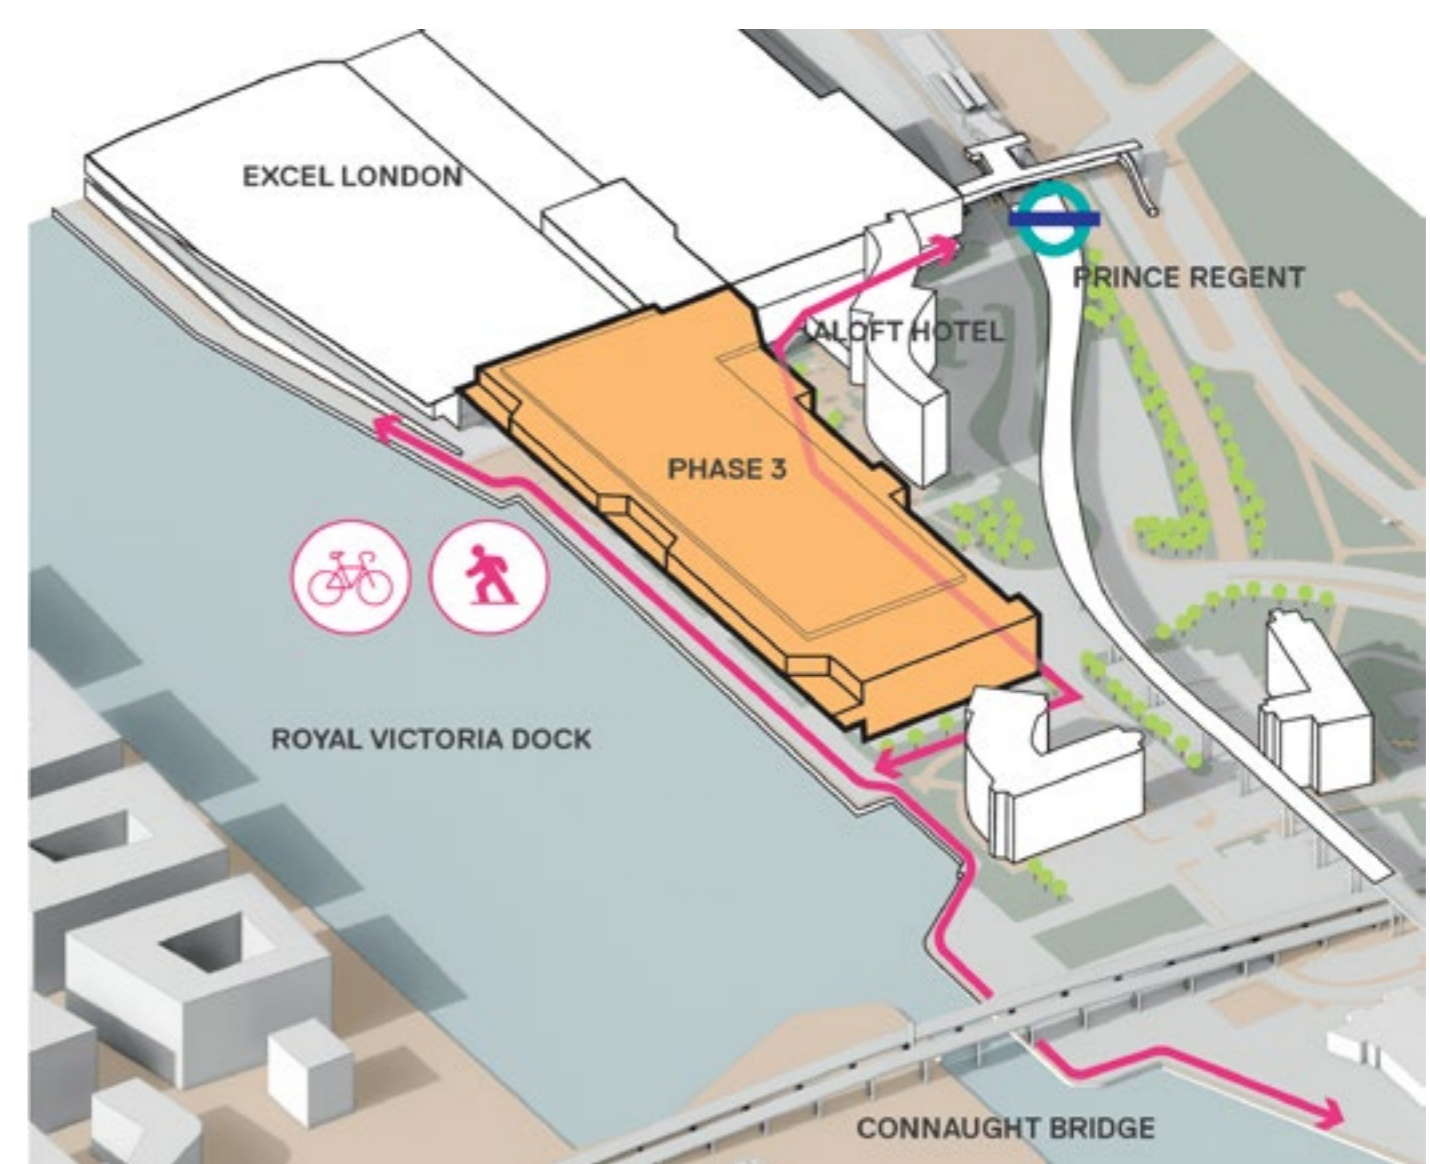

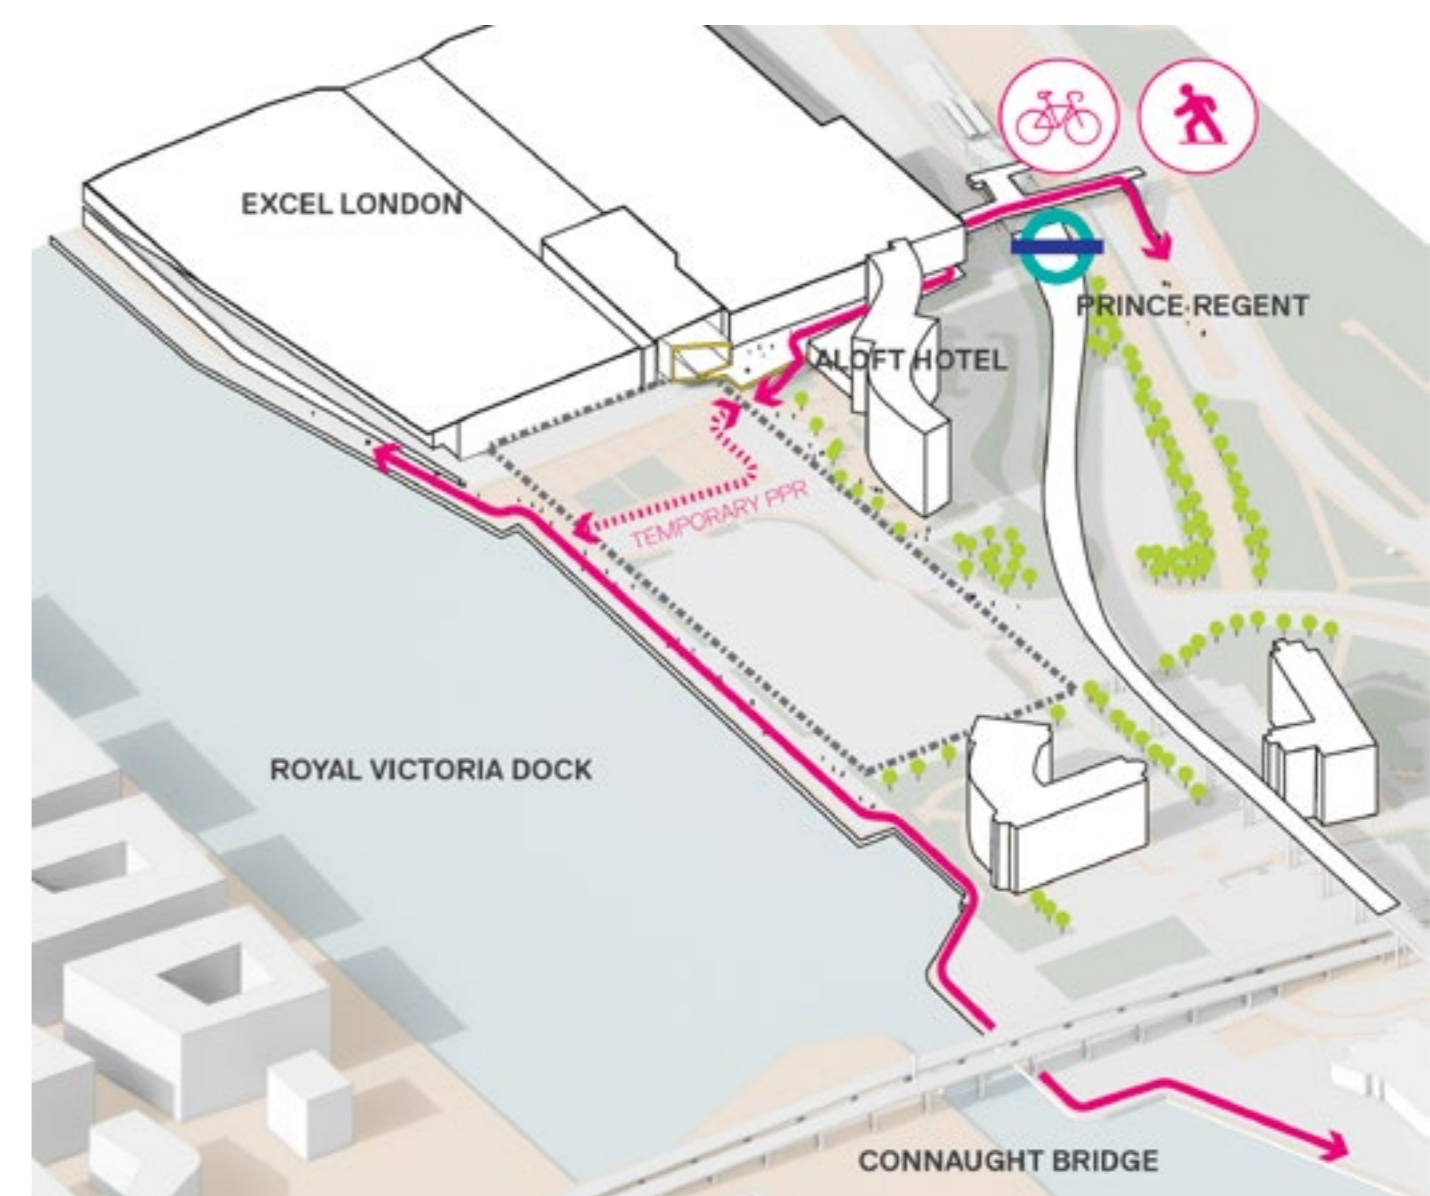

The re-routed PPR will allow us to make improvements to the public realm around the walkway, with new planting and trees that will improve the experience for visitors and local people, making the area more welcoming and safe.

The improved connectivity between the DLR, ExCeL and the dock-edge will also allow us to provide new dedicated pedestrian and cycling connections, making the area more inviting for walkers, joggers and cyclists.

View looking east towards the northern facade and public realm

Our proposals reflect the key routes as identified in the draft Royal Docks Opportunity Area Planning Framework (OAPF) and will allow us to make a positive contribution to the wider community, as well as helping to shape local policy.
