

SUPPORTING NEWHAM & LONDON'S GROWTH

CURRENTLY, EXCEL LONDON SUPPORTS **37,600 JOBS** AND DIRECTLY EMPLOYS OVER **160 PEOPLE**, OF WHICH **39%** LIVE IN EAST LONDON.

As Newham and London begin the long road to recovery from the effects of Covid-19, it is imperative that organisations like ExCeL London support local people and businesses.

Phase 3 will build on our legacy, creating an additional 170 new jobs. Our aim remains that 50% of these opportunities should be for local people.

We anticipate that a further 130 new full-time jobs will also be created during construction, and we have opened discussions over potential apprenticeships and training opportunities for young people.

The proposals will provide opportunities for new leisure facilities and will help to support Newham's wider recovery plan from Covid-19.

Supporting the NHS

ExCeL London continues to play an active role in supporting the NHS, the Government and local community in the nation's response to COVID-19. At the beginning of this year, NHS Nightingale London was reopened providing a rehabilitation facility for non-COVID patients. In addition, a vaccination centre opened at ExCeL, with the elderly and health-workers being the first to receive their vaccine. We are proud to be supporting the NHS and its wonderful staff during this unprecedented and challenging time.
